

IMPLEMENTATION ARRANGEMENT

Between
Research Center for Innovation and Feed Technology
Universitas Syiah Kuala, Banda Aceh, Indonesia
and
SAFE-NETWORK
Asia Pacific Network for Sustainable Agriculture, Food, and Energy

Pursuant to the broader cooperation between the the Research Center for Innovation and Feed Technology, Universitas Syiah Kuala (USK), Indonesia, and SAFE-NETWORK the Asia Pacific Network for Sustainable Agriculture, Food, and Energy, both PARTIES hereby agree to implement the following collaboration.

Scope of Collaboration: This agreement outlines the joint organization and implementation of a *Product Innovation Competition and International Community Engagement Program*. The program aims to provide a platform to showcase innovative solutions and impactful community engagement initiatives related to sustainability, with a focus on agriculture, food systems, and renewable energy.

Provisions: The objectives of this collaboration are threefold: (1) to promote sustainable innovation and entrepreneurship among students, researchers, and community-based organizations; (2) to foster international collaboration and community outreach within the Asia-Pacific region; and (3) to document and share best practices in inclusive and sustainable development.

Terms and conditions:

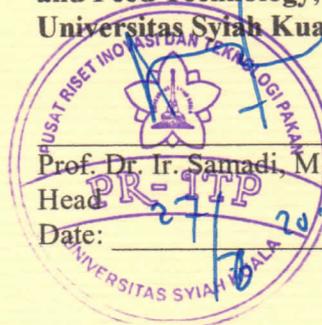

- a. The program will consist of two major components: a Product Innovation Competition and an International Community Engagement Program. The competition will involve co-hosted innovation challenges, a joint call for proposals, mentoring sessions, a judging process, and a public exhibition of finalist products. The engagement program will include field-based activities, capacity building workshops, and collaborative knowledge sharing efforts in selected communities within Indonesia and other SAFE-Network member countries.
- b. In terms of roles and responsibilities, the Research Center at USK will take the lead in coordinating local organizing teams, and facilitating university-community linkages, while SAFE-Network will manage international participant coordination, provide expert mentors, and promote the event through its regional platforms.

Implementation Period: The implementation of this collaboration will take place over a period from June 26-28, 2025, which will be held in Hanoi, Vietnam.

Funding and Resource Sharing: Each party will be responsible for securing and managing its respective resources. Joint funding proposals to external agencies may be pursued by mutual consent.

This Implementation Arrangement is prepared and agreed upon to support mutual objectives and strengthen academic, scientific, and community collaboration.
